Permanent, non-toxic, non-freezable, non-flammable ink. Ink performs reliably as a benefit denial device and causes no harm on contact.

- Compatible with SuperTag detacher. Customers can upgrade to ink security without changing detectors.

- Premium performance and durability. Small, lightweight design.

- Exceptional protection. Includes a patented rotary clamp lock and spring gate mechanism inside detacher channel, which offers an additional layer of defeat resistance.

**Sensormatic® SuperTag® Ink**

SuperTag Ink is the newest addition to the Sensormatic SuperTag portfolio. The industry-leading hard tag family now incorporates the advantages of patented Ultra•Max® hard tag and a special ink formula for an unparalleled level of merchandise protection. The integrated ink vial combats tag cutting defeats, providing a high level of deterrence in challenging situations. SuperTag Ink’s unique design protects high-risk, high-value merchandise in department and specialty store environments or anywhere apparel or fashion accessories are found.

The small, lightweight stylish design of SuperTag Ink provides a visual deterrent that complements other Sensormatic re-usable tagging solutions. SuperTag Ink provides an optimal solution for in-store apparel and accessories protection. Combining SuperTag with benefit denial enables loss prevention professionals to deploy a new layer of security against shoplifters.
